Profile

Since turning my passion into a career, I have been writing code that powers websites, web-apps and mobile-apps. I have a huge thirst to learn new skills, and I strive to continue challenging myself. Understanding the business aspects of my work, and what makes money, is always at the forefront of my mind. I'm currently seeking a permanent role within an exciting company with a clear career path.

Skills and Languages

JavaScript (ES5 & ES6+) • ReactJS • React Native • NodeJS • ExpressJS • GraphQL • Webpack
• Git and Github • SQL and No SQL databases such as PostgreSQL and MongoDB • Jest •
Experience with older browser platforms such as IE11 • HTML5 • CSS3 • SASS

Work Experience

FULL STACK DEVELOPER, CIRCULAR WAVE, LONDON, SEPTEMBER 2018 - PRESENT

As part of an agile team, we have developed a React web-app and a React Native mobile-app for NHS trusts to manage their workforce.

My main responsibilities -

- Develop features appropriate to scale, extensibility, and scope of the problem
- Adhere to the DRY principle whilst maintaining a very large code base
- Contribute towards a database migration from NoSQL to SQL
- Implement a variety of testing to our product. From unit tests to regression testing on different browser platforms e.g. IE11 and Chrome, and mobile platforms e.g. iOS and Android
- Regular peer code reviewing and technical feedback with the development team
- Provide technical customer support. This enabled me to build relationships and add real customer value to the product
- Follow Scrum methodologies, such as regular refinement meetings with the project owner and the development team to flesh out development tasks from feature specifications
- Implement technical planning on upcoming development tasks. This is to assess risks and consider how any changes will affect our application

Technologies and tools -

- React JS web application
- React Native mobile application
- NodeJS micro services on the backend serving RESTful APIs
- PostgreSQL and Firebase databases
- Git/GitHub version control
- Jest Test Suite for unit testing
- Jira Management tool to track development work

**AUDIO ENGINEER/SENIOR TRANSFER ENGINEER, JUNGLE STUDIOS, LONDON,
NOVEMBER 2013 - JULY 2018**

Lead voice director, sound designer and mixer for Nickelodeon's Shimmer and Shine TV series in one of London's top post production studios. Collaborating with a team of producers, creatives and editors to ensure episodes are delivered according to strict deadlines at broadcast quality. Working with clients and high profile voice actors on a daily basis.

Education

University Of Hertfordshire – BSc (Hons) 2:1, Sound Design Technology - 2006-2009
Havering Sixth Form College - AVCE Double Award, Grade - BC, ICT - 2004-2006

Personal Interests

When off the screen, I love to collect vinyl and discover new music. As a teenager I was lucky enough to tour around Europe in a jazz band playing the trumpet. From a young age, I've been a big supporter of one of the loves of my life - Tottenham Hotspur!
